

WorldEmergency Shelters

WorldEmergency is an emergency supplies manufacturer, supplying the needs of people worldwide from international government agencies, to corporations in the private sector and the general public.

We design and manufacture a variety of emergency kits for earthquakes, floods, fires, and civil unrest. One of our major premiere emergency kits is called "The House in a Bag" which has every thing you need for a family of four. This line of disaster kits comes standard with a deluxe family tent for shelter in case your home was destroyed. We also provide a premium heavy-duty family boat or life vests in case of major flooding, clothes to wear, a portable toilet, enough food and water for a family of four, and all other basic necessities in times of crises.

WorldEmergency also manufactures a complete line of portable emergency shelters such as homes, schools, offices, stores, an emergency hospital unit, and communication center unit. All these emergency facilities are designed and constructed from solid steel shipping of which we fashion into every desired facility that will be critical limits in a major disaster.

We design and manufacture a basic 40 feet high cube steel structure, cut out the windows and doors, place in the desired floorings such as hard wood oak floors or ceramic tile. We also design ceiling fan systems, and centralized air for cooling and heating, along with various ionized air filtration and cleaning systems; all this to make the environment inside your facility as comfortable as possible. Also, the water and power design within your facility is a solar and battery power system and that can provide you with all the energy you need to run all your lights, appliances, and other household and office equipments. This is our ESP (Energy Solar Power) Monolith System. We can provide all types of facilities whether it is a home, office, school, or hospital, we have the design facility that you need.

The reason we have designed the system inside the container is because it provides a wealth of benefits. First of all, it is solid steel and can withstand pressure of one million pounds. The unit is universally designed worldwide with international specifications which remains the same throughout the world. Therefore, it can fit a truck, train, and a boat, and therefore, its mobility is very versatile and can be transported throughout the world. Moreover, it can withstand an approximately 8.5 earthquake. The roof will virtually never collapse on your head because it is made of solid steel. It is the most portable facility system used today throughout the world.

This is how we manufacture all of our facilities and shelters, giving it the basic foundation structure of strength and mobility needed in an unstable world.

We can design any facility according to your specifications.

If you're interested, please send us an email at worldemergency@mail.com or go to our website at www.worldemergency.com. Or you can call our office at (888) 349-0320.

Sincerely,

**Chuck Thompson, Director

Mobile Facilities and Shelters

Creating safe and secure facilities where you live and work for the turbulent world we live in.

We Shelter and Protect the World

<i>WorldEmergency Homes</i>	<i>Red Cross Command Centers</i>
<i>Emergency Shelters</i>	<i>Back-Up Business Center</i>
<i>School (Classroom) Units</i>	<i>Convenient Store Chains</i>
<i>Civil Unrest Center</i>	<i>Gas and Propane Station Units</i>
<i>Emergency Communication Satellite Internet Phone Centers</i>	<i>Food Storage Warehouse Units</i>
<i>Hospital Emergency Room Units</i>	<i>Department Store General Merchandise Units</i>
<i>Emergency Kitchen Units</i>	<i>Private Doctor's Examination Office</i>
<i>Water Supply & Purification Centers</i>	<i>Dentist Facilities Unit</i>
<i>Toilet & Shower Facilities Unit</i>	<i>The Company Office Room Unit</i>
<i>Jail or Detention Centers Unit</i>	<i>Temporary Hotel Rooms or Emergency Team Rest Quarters</i>
<i>Police & Fire Department Command Centers</i>	<i>World News Reporting Unit</i>
<i>Government Agency Offices</i>	<i>Foreign Government Agencies Offices</i>
<i>Generator Power Units</i>	<i>Construction Offices and Sleeper Unit</i>

Whatever your needs are, we can custom-design your facility according to your exact specifications and desires, anywhere in the world, wherever you live and work. We have a back up facility for the world's basic necessities of life, food, clothes, shelter, medical first aid, and world communications—all operating within safe, secure structures that are earthquake, fire, and flood resistant and can be made bullet-proof for times of civil unrest.

Benefits of Our Shelters

WorldEmergency Facilities' benefits are almost endless in regard to the strength, capabilities, multiple functions and mobile versatility of our shelters.

First, **the strength capabilities** - the frame and structure of all our units are made of solid steel capable to withstand one hundred containers stacked up on top of it without structural damage (that is approximately one million pounds of pressure). The solid steel structure is virtually flood- proof and fire resistant. Also, the structure can withstand up to a magnitude eight earthquake.

Moreover, all facilities are designed to meet or surpass most building codes and specifications, whether home or business, within the state of California which has some of the most strict safe and secure building code laws on record.

The **multiple functions** of our facilities are incredible. It can function worldwide as a house, office, school, hospital, store, or any kind of business operation that exist today. Our facilities are simply designed and manufactured to fit the desired look and feel of traditional homes and businesses.

Our concept is that every structure starts as a container. Any home or building starts with a basic foundation of walls and ceiling. Whatever it is made of such as wood or stone, it starts as a basic rectangular structure. However, WorldEmergency facilities are made of steel pre-designed, ready to go structures, or as we say at WorldEmergency, "a cake ready for any kind of icing you want us to place on it;" we design your home or business tailor-made for you.

The third benefit is **Mobile Versatility**. Our WorldEmergency facilities can be transported on every transportation system we use today, whether by ship, train, truck, or cargo airplane. For example, if there is a fire coming and your house happens to be in its path, you can simply move the container by truck and trailer and then move it back to its original spot when it is over. If there is ample moving time, you can do the same with a flood or other pending disaster or emergency. As a matter of fact, internationally, there is no other basic building structure that is already intact anywhere in the world that is more versatile to transport than our WorldEmergency Shelters.

Moreover, in regards to moving, there is virtually no need for packing. All WorldEmergency Shelters we design, whether home or business, come fully furnished with all your basic appliances or office equipment which are firmly bolted to the wall or floor foundations, including a computer and copier, fax, printing machine that we provide, which are also securely bolted to your desk which we also provide free of charge.

WorldEmergency Water and Power Facilities

Our WorldEmergency facilities are equipped with their own water and power sources which are designed to operate without being hooked up to the local power source of the area. Most shelters are designed with replaceable and refillable water tank systems.

For example, there are separate tanks for the bathroom's clean water and gray water system. There is also special clean water in the kitchen and gray water tank system. All tanks can be replaced or refilled at any clean water source or from a garden hose hooked up to a local water source.

The power design and functions of our facilities are a very unique and of special benefit to the privileged owner. All lights and other small electrical devices can run and operate on their own, without any local electricity hook ups from your area.

All homes and businesses are pre-wired throughout the facility, to all innovative outlets which are connected to solar panels on the roof which charge up, and store, just about all the power you need within the uniquely designed and installed battery packs inside the walls.

The power packs are connected to powerful inverters which convert the power from 12 Volt power to 110 or 220 outlets. This patented water and power system can be set according to the specifications in your part of the world.

Our inverters are specially designed within the house or business electrical outlets, for the basic use of that room and space. For example, the kitchen areas in the home unit will have a larger watt capacity; the bedroom inverter outlet watt capacity packs will be smaller.

This patented power flow systems design helps balance the power usage within your home or business to maximize all your power needs 24 hours a day.

All homes and businesses are pre-wired throughout the facility, to all innovative outlets which are connected to solar panels on the roof which charge up, and store, just about all the power you need within the uniquely designed and installed battery packs inside the walls.

This patented power flow systems design helps balance the power usage within your home or business to maximize all your power needs 24 hours a day.

WorldEmergency Generator Power Source

Additionally, if power is somehow depleted from all the power sources that are designed in your WorldEmergency facility (for example, heavy use or lack of sunlight to maintain the battery outlet charge), all units come complete with an emergency back up power unit which will extend the charge of your original power system.

The backup power source is also uniquely designed with a powerful 2,500 watt inverter which can fully charge in very little time by your car alone. This WorldEmergency Power unit fully charged, can operate basic lights with normal night time uses within your home or small business for about two weeks without charging. Moreover, the WorldEmergency Power unit comes with an optional solar panel or wind charging unit.

The reason we stress water and power constantly, is because without it, your current home or office will only be a shell—an empty box. Therefore, it is an extreme necessity to have in our modern world. And the new troubles we have with world energy costs rising higher and higher, homes and businesses won't be able to afford it.

All WorldEmergency units have basic design price packages which are very generously fully equipped, so your home or business can be ready to go, up and running, upon delivery.

We are looking forward to designing your WorldEmergency facility, equipped with all that you need.

Sincerely,

Chuck Thompson, Director

WorldEmergency E.S.P. Monolith System

The WorldEmergency E.S.P. Monolith System is a solar power generator that will give you all the electrical power you need for your home. This uniquely designed power system is a renewable energy source that will give electrical power to every outlet in your home without heavy installation or costly reconstruction within your home.

The E.S.P. Monolith System is designed and constructed inside a black box system. Shelved inside on racks, are patented rechargeable energy cells. This generates enough power to operate a single family home, twenty-four hours a day, including basic appliances such as refrigerator, stove, microwave, washer and dryer, and air conditioning, within normal operational usage. For example, if a single family house utilizes about 3 to 6 kilowatts per day, our E.S.P. Monolith System has approximately double that capacity. Moreover, it will regenerate its power with our patented solar cells design system. This solar system is installed directly into our monolith black box, which maintains the energy power levels within the system. This is how the WorldEmergency E.S.P. Monolith System gives you uninterrupted power twenty-four hours a day.

We simply install our power system direct to your home's electrical power box source and arrange the solar cell panels to your home, giving you power twenty-four hours a day everyday, with no need to be connected to any other power source. For prices and other detailed information, please refer to our website at <http://www.worldemergency.com>

WorldEmergency Shelters

The homes are designed in four styles with the square foot size ranging from 320 square feet up to 2,240 square feet.

The single unit called "**House to Go**" can sleep, very comfortably, a family of four. All bedroom furniture, with work desk and new computer, bathroom accessories, and kitchen appliances are all included, including stove, microwave, refrigerator with water and ice in the door, washer and dryer, dishwasher, sink with garbage disposal, and a complete solar power electrical system to run all your lights and appliances comfortably on a daily basis.

The next level home called "**The Greenwood**" has three units united together into a 960 square foot family residence. It is designed fully equipped and completely furnished. The Greenwood Unit has 3 bedrooms, three bathrooms, full kitchen with all major appliances such as refrigerator, stove, microwave, clothes washer and dryer, and dishwasher. It has a cozy family room with fireplace built-in, CD and DVD stereo, television and music system with speakers in every room. The master bedroom is one single unit with built-in cedar closets and a convenient office desk organizer system built in. All these items are anchored in place on top of a hardwood floor finish. Also, it has a see-through wood fireplace which you can view from your canopy queen-size bed system that has a bottom drawer space design to provide additional storage. The master bathroom, leading from the master bedroom, also utilizes the same see-through wood fireplace which will warm you up nicely next to your whirlpool jet Jacuzzi that is provided standard at no additional charge. Also included are his and her double sinks and double mirror cabinet set.

There is also a five unit home, which is 1,600 square feet, called the "**Mid-Wilshire House**" and our premium 7 unit home, 2,240 square feet, called the "**Gray More Lane Manor Home.**"

The **Mid-Wilshire House** has two additional fully furnished units for your business and family gatherings.

This gives you five high-cube 40 foot units, again totaling 1,600 square foot. These extra two units provide you with the luxury and convenience of working from your home, with all the office furniture and equipment you need to finish your work. Your business office includes an extra office room with all the amenities and comfort you will expect in a director's office. It comes complete with an executive desk set, computer, fax and printer; also, reception room with information desk set for your secretary and comfortable chairs for your clients. And it also comes with a bathroom and shower.

The **Gray More Lane Manor Home** comes complete with seven complete units, totaling 2,240 square feet. This manor includes everything the **Mid-Wilshire House** offers and provides, plus a family pool and Jacuzzi spa units with bathroom, shower, and dressing rooms. Moreover, an additional unit comes with a professional gym work out room furnished with a complete body building universal exercise machine with various work stations, including two exercise bikes, two deluxe high-speed treadmills, complete barbell set with the various weights, and an aerobic work out mat.

WorldEmergency makes various other units with different applications such as schools, hospitals, and emergency facilities.

The **WorldEmergency Schools** come complete with twenty-four computers with space for forty-eight students including their various desks and chairs. This includes the two DVDs and VHS video monitor TVs for satellite hookup with various classrooms around the world, including cable channels with CNN Learning Center and MSNBC and the BBC. Optional is satellite dish which will provide high speed internet for all twenty-four computers for international applications in teaching. We can provide these internet units at a moment's notice. They come fully equipped and also run off their own solar panels and batteries with no need to be hooked up with local power to an area. Therefore, you have virtually no electricity bill. Bathrooms are optional and can also be included.

Our **WorldEmergency Hospital Unit** comes complete with all the different power outlets that you will need to hook up various hospital equipment and emergency monitoring units. Various shelving systems for sterilized equipment, towels, and medical wares come included in this unit, ready to be used. It also comes complete with forty-eight roll up beds. Optional will be various gurneys and emergency equipment.

Our **WorldEmergency Satellite Communication Center** has various applications for emergencies when people need to get in contact with their loved ones worldwide and it has a satellite hook up and can also be used as a world news reporting unit. It has various hookups for TV monitors and equipment. Also, it runs off its own solar panels and battery packs which are powerful enough to run any satellite equipment and links for your news crew and reporters, and charge up battery cameras and such. The unit can also be made bullet-proof for those hot spots in the world such as the Middle East and other parts of the world that is dealing with wars and civil unrest.

For more information and details about our houses and centers, please call us at (888) 349-0320 or email us at worldemergency@mail.com and we will respond.
